

## Roll the sound active learning game

### Preparation

Print and then cut out the circles. Spread them on the carpet. Laminate if required.

### Instructions

- Children could play individually, in pairs or as an adult led group.
- Each child should roll a large dot pattern dice and jump on or stand next to the sound that matches the number. If the dots are laminated, children could sit on them rather than jump on them to avoid slipping.
- The child could then say the sound or something that begins with that sound.
- If playing in pairs, children could collect the sound as they roll the dice and see who has the most.
